

## Herley Subsidiary, Innovative Concepts, Inc. Wins \$13.5 Million Award from the U. S. Army for Improved Data Modem Software/Technology

April 03, 2008

LANCASTER, Pa., April 3, 2008 /PRNewswire-FirstCall/ -- Herley Industries, Inc. (Nasdaq: [HRLY](#)) announced today that its wholly owned subsidiary, Innovative Concepts, Inc. in McLean, Virginia, has received a contract award of approximately \$13.5 million from the U. S. Army in support of ongoing software development of Improved Data Modem (IDM) software and technology.

Innovative Concepts developed IDM Technology(R) to supply data services in extreme physical environments where highly mobile data communications is required. IDM Technology(R) provides a robust set of data communications solutions deployable in virtually any mode of operation that places a premium on mobility and high reliability under less than optimum conditions. Software upgrades are being developed to meet mandates required for command and control, situational awareness and improved data links.

Myron Levy, the Company's Chairman and CEO, said, "This award is the result of a long-term business relationship and planning with the U. S. Army to bring innovative technology to the battlefield. We are proud to support the war fighters by providing the best tools available for their missions." Mr. Levy continued, "My congratulations go out to the management and staff of ICI on this well-deserved award. ICI is recognized as one of the premier providers of wireless data communications products and services."

Herley Industries, Inc. is a leader in the design, development and manufacture of microwave technology solutions for the defense, aerospace and medical industries worldwide. Based in Lancaster, PA, Herley has eight manufacturing locations and approximately 985 employees. Additional information about the company can be found on the Internet at [www.herley.com](http://www.herley.com).

Innovative Concepts, a wholly owned subsidiary of Herley Industries, Inc. (Nasdaq: [HRLY](#)), specializes in the research, design, development, production and support of wireless data communications products and services for the defense and intelligence communities. Their expertise includes: IDM Technology(R) product line; Mobiquiti (TM) mobile, ubiquitous communications; and expert engineering.
